

**How to
get ahead
in critical
times?**

**Make every
step count**

Did you know that the cost of products only make-up 1/3 of the total construction costs?

That's right, the rest are accounted by installation and commissioning charges. That means that only a fraction of your bottom line depends on a known variable. The other 2/3 can be easily overwhelmed by hidden or even unforeseen costs like installation delays, error-solving and last-minute design changes; all which can have an enormous impact on your ROI.

How can you mitigate that?

When times are critical every step counts to ensure a smooth and efficient HVAC installation. Which is why our products have been cleverly designed to have fewer variants, greater installation possibilities and adapt to real on-site conditions. So, you can feel confident that your equipment choice **saves precious installation time, mitigates risk and maximizes the value of your work.**

How can we help?

IMI Hydronic Engineering benefits from over 300 years of combined knowledge in 3 key areas of HVAC. This means we can expertly combine products as a solutions package that ensure all components are optimally working together as a unified team and deliver trouble-free installations.

 **IMI TA**

Since 1897
Balancing, Control & Actuation leader

 **IMI PNEUMATEX**

Since 1909
Pressurisation & water quality leader

 **IMI HEIMEIER**

Since 1928
Thermostatic control leader

Great results require a great combination.

The solutions package below is the ultimate team
in preventing and solving critical HVAC design challenges:

The choice of HVAC
equipment can
have a big impact
on the pace of the
installation,
so choose the right
team wisely.

Behind every great team, is another great team

Our experts provide you with hydronic support
to help you tackle even the most complex HVAC
challenges; product selection, sizing, all the way to
the installation and final commissioning.

Expert Support

Save time in installation

Transfero Connects offers world-class pressurization performance, vacuum degassing and water make-up all in 1 device. This great value option saves space and only requires 2 electrical connections rather than the typical 4.

Transfero Connect system

 IMI PNEUMATEX

3-in-1 pressurization device delivers up to

50%

time-saving in installation*.

Efficient and robust dirt separator that can be mounted vertically or horizontally to suit the needs of the installation and save precious space.

Zeparo G-Force separator

 IMI PNEUMATEX

Up to

9x

better separation regardless of the position of installation

Save time in commissioning

This controls solution is fully configurable via a smartphone app, so you don't have to get into dark ceilings with screwdrivers to set dipswitches. It includes over 200 settings to allow full on-site adaptability. The "Copy and paste" function allows to replicate actuator configurations with only the push of a button.

TA-Slider and HyTune app

Enables effortless heat distribution and up to

75%

time-saving in commissioning*.

Effortless hydronic balancing without the need for complex system calculations or measuring instruments thanks to Automatic Flow Control technology. Just set the desired flow directly on the valve.

AFC technology for radiators
& underfloor heating

Achieve accurate flow control and up to

50%

time-saving in commissioning*.

* In comparison to standard technologies

Our biggest strength

We are proud of our quality product portfolio and established brands, but our biggest strength is our people. Their practical expertise and drive to support our customers is what differentiates us in helping you tackle HVAC challenges.

"Every project is unique, so by working together from the start we can lay the right foundations that will really save time during the installation phase. But, beyond that, I am by your side every step of the way until the final commissioning. For me this is what differentiates us from the competition; I am looking to build long-lasting partnerships with our customers, not just deliver". products".
