

**How can
successful
ventures
endure?**

**Its is all
about
resilience of
performance.**

Did you know the investment into the HVAC system has a critical impact on the value of the building itself?

That is because the HVAC system may only account for 20% of your building investment, but it can account for over 50% of its energy usage. This is intensified by tenants becoming more demanding on the levels of comfort expected from their spaces.

How can you mitigate that?

Just like a great team is a reflection of its members, a performant HVAC system depends on the quality of its equipment. The right HVAC equipment can help minimize the building's operating costs, maximize tenant comfort and protect the lifespan of the system installation **to secure your building value and ensure your investment is a long-term one.**

 IMI TA

Since 1897
Balancing, Control & Actuation leader

 IMI PNEUMATEX

Since 1909
Pressurisation & water quality leader

 IMI HEIMEIER

Since 1928
Thermostatic control leader

The HVAC system accounts for

50%

of the building's energy usage.

How can we help?

IMI Hydronic Engineering benefits from over 300 years of combined knowledge in 3 key areas of HVAC. This means we can expertly combine products as a solutions package that ensure all components are optimally working together as a unified team and deliver resilient performance.

Great results require a great combination.

IMI HEIMEIER

IMI PNEUMATEX

IMI TA

The solutions package below is the ultimate team in preventing and solving critical building challenges:

The choice of HVAC equipment can have a big impact on your building value, so choose the right team wisely.

Future proof your building's with smart connectivity

Just like our smart controls solution, our pressurisation equipment can also be integrated into the BMS (Modbus RTU and TCP-IP) for 24/7 access, monitoring and controllability of critical system parameters.

Compresso Connect equipped with Brain Cube control panel

Keep tenants satisfied while saving energy

System noise is really upsetting to tenants but can be easily prevented. By removing the air circulating in the system you fight noise and stop the formation of dirt particles that compromise system efficiency.

Vento Connect degasser

 IMI PNEUMATEX

Up to

50%

more efficient in removing system air.

Deliver precise and stable room temperature that keeps residents comfortable whilst only using the minimum required energy to do so.

TA-Slider & TA-Modulator

 IMI TA

Stable indoor temperature delivers up to

18%

energy savings.

Distribute appropriately the heat throughout the building to avoid temperature imbalance, tenant complaints and energy wastage.

AFC technology for radiators
& underfloor heating

 IMI HEIMEIER

Effortless heat balancing and up to

25%

energy savings.

Safeguard your CAPEX with reliable system protection

Protect your critical HVAC investment from dirt accumulation that clogs components and significantly reduces heat transfer and efficiency. Keep system water clean by removing dirt quickly.

Zeparo G-Force separator

 IMI PNEUMATEX

Up to

9X

more efficient at capturing even the
smallest dirt particles

Our biggest strength

We are proud of our quality product portfolio and established brands, but our biggest strength is our people. Their practical expertise and drive to support our customers is what differentiates us in helping you tackle HVAC challenges.

Fabio Bonafini

"The buildings of tomorrow are expected to deliver even better comfort and flexibility, with minimal energetic impact. Our great solutions and hydronic know-how can help building owners achieve tomorrow's building standards today".
