

TA Fast-Fit

Prefabricated solution
for terminal units

TA Fast-Fit is our newest prefabricated product for use with small terminal units in both heating and cooling applications

Key advantages over traditional installations:

-  **Faster installation on site**
-  **Easy setting and sizing with PIBCV ensures total control**
-  **Reducing the risk of leakage and installation errors**
-  **Time saving on system commissioning**

Highly reliable

Fully assembled and factory pressure tested to ensure reliability

Easy Installation

Each unit comes ready to install and uniquely labelled saving time on site

Quick hydronic balancing

The pressure independent solution provides direct setting of the max flow

Precise flow control

The modulating version provides uniquely shaped EQM characteristic for best modulating control

TA Fast-Fit – Prefabricated solution for terminal units

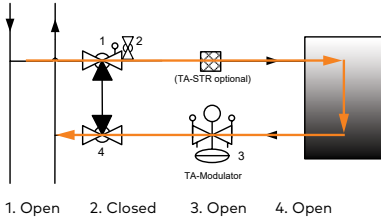

- Size Range ½" - 1¼"
- Bypass (for flushing & isolation) / test-point / drain / strainer on flow
- PIBCV & Actuator on the return to aid with balancing & control

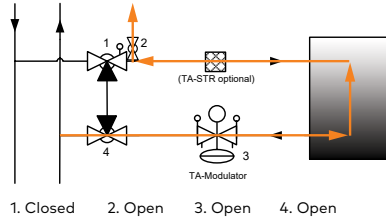

Operation Functions

Making system commissioning hassle-free

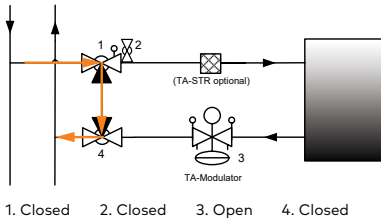

Normal operation

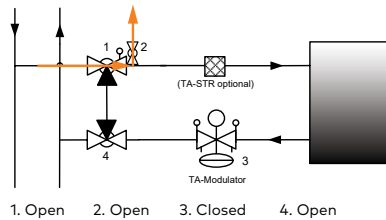

Back flushing

Flushing the distribution system

Forward flushing

Actuators / Hoses / Adapters

Selection of accessories available for the Fast-Fit solution.

Accessories	Compatible TA Fast-Fit product
 <p>TA-Slider 160 For Modulating Control *included with the TA Fast-Fit</p>	TA-Fast-Fit with PIBCV TA-Modulator ½" - 1¼" TA-Fast-Fit with PIBCV TA-Compact-P ½" - 1¼"
 <p>FHA1 Hose</p>	TA-Fast-Fit with PIBCV TA-Modulator ½" - 1¼" TA-Fast-Fit with PIBCV TA-Compact-P ½" - 1¼"
 <p>SWT Conn. Adapters</p>	TA-Fast-Fit with PIBCV TA-Modulator ½" - 1¼" TA-Fast-Fit with PIBCV TA-Compact-P ½" - 1¼"
